

# PET DOSAGE GUIDE

When our pets panic, we panic. Dogs, especially, tend to be anxious creatures when certain sounds or sights set them off, from rain and thunder to fireworks and the Amazon delivery man. No one likes to see their pets suffer, so when it comes to assuaging the nerves of a jittery Jack Russell or a petulant pussycat more pet owners are looking towards CBD for pets.

So how does CBD for pets help with anxiety relief? Cannabidiol for the hemp plant has been known to alleviate stress in humans and pets. When CBD attaches to an endocannabinoid system receptors – whether it be human or animal – found throughout the body are then engaged, so when the body is experiencing tension and stress, CBD allows the body to calm down thanks to the interaction between the CBD and the receptors.

**For best results use daily.**

**Determining the perfect dose will require experimentation.**

The right dose can vary quite a bit depending on your pet's physical make up and what you are treating.

CBD can help issues in animals such as; anxiety, stress, arthritis, seizures, aggression, neurological disorders, mood and more!

CBD does all this by stimulating your pet's endocannabinoid system. Every animal has different amounts of cannabinoid receptors, so you will need to experiment to find the right dose. Expect to see minor results within 30-60 minutes of ingestion, allow approximately 1-2 weeks for the CBD to build up in the body to observe the effects fully. If after 2 weeks you do not have the desired effect, it is time to up the dose! Try an extra 2 drops to start and incrementally increase until you feel your furry friend has the best results possible.

# PET DOSAGE GUIDE

Weight	Dose
<5lbs	2 Drop
5-10lbs	8 Drops
10-20lbs	16 Drops
20-30lbs	24 Drops
30-50lbs	30 Drops
50-70lbs	38 Drops
70-90lbs	1 Dropper + 6 Drops
100lbs	1 Dropper + 16 Drops
150lbs	2 Droppers
200lbs	3 Droppers
250lbs	4 Droppers

Start with the recommended dose and expect to see minor results in 30 – 60 minutes, and major results within 2 days

For best results use daily.

To control pain, give every 8 hours or as needed.

For other uses, or to break unwanted behavior patterns, give once or twice a day

**Willow Bark is toxic to cats, contact your vet immediately if ingested.**

**1 Dropper = 5mg CBD**

**1 Dropper = 40 drops**
